CONTENT SYSTEMS.AI

Every AI helper needs an owner

The 1-page owner sheet we use. Fill in 1 page per AI helper: what it does, who checks it, what it can do alone, and what it tells its owner each day.

Why now

MANAGERS WHO EXPECT

58 in 100

To oversee more AI helpers than people within a year.[1]

MANAGERS WHO WORRY

46 in 100

About losing control of what those AI helpers do.[1]

OUR OWN COMPANY

100+

AI employees, each with a person whose name is on it.

1 Nielsen survey for Monday.com, 1,700 managers in 7 countries, via TechCrunch, Oct 21 2026, techcrunch.com/2026/10/21/ai-promises-productivity-but-for-managers-its-mostly-a-headache-for-now-says-new-survey

The 3 questions that decide it

01

Who checks its work? 1 named person, every day. Not "the team".

02

What can it do alone? Write the line down, and where it needs a yes.

03

What does it report? A short daily note to its owner: what it handled and what it passed on.

Without an owner, a helper that drifts goes unnoticed until a customer notices first.

The owner sheet

Print 1 per AI helper. Keep it where the owner and the team can both see it.

AI HELPER _____ OWNER _____ BACKUP OWNER _____

01 Its job

WHAT IT DOES, IN 1 LINE _____

WHERE IT WORKS _____

DONE LOOKS LIKE _____

02 Its limits

Does alone

Routine, on record, easy to undo.

- [ ] _____
- [ ] _____
- [ ] _____

Needs a yes

Money, promises, anything that leaves.

- [ ] _____
- [ ] _____
- [ ] _____

Never does

No exceptions, even if asked.

- [ ] _____
- [ ] _____
- [ ] _____

03 Its daily note to the owner

- [ ] What it handled today, with a count
- [ ] What it passed to a person, and why
- [ ] What a person corrected, so the instruction gets fixed
- [ ] Anything unusual it noticed but didn't act on

04 The off switch

WHO CAN PAUSE IT _____

HOW, IN 1 STEP _____

A filled-in example

An order status helper for an online store. Illustrative, not a client setup. Yours will be shorter or longer, but never blank.

AI HELPER
Order status replies

OWNER · BACKUP
Support lead · ops manager

WHAT IT DOES
Answers "where's my order?" emails with live tracking.

WHERE IT WORKS
The support inbox and the store's order list.

DONE LOOKS LIKE
Customer has a date and a link, same day.

OFF SWITCH
Support lead pauses it in the inbox settings.

DOES ALONE
Replies with tracking status and the delivery date the carrier shows.

NEEDS A YES
Reships, refunds, any new delivery promise, any upset customer.

NEVER DOES
Changes an address, cancels an order, offers a discount.

DAILY NOTE
Handled 140 · passed on 11 · corrected 2 · 3 parcels stuck in 1 depot.

4 signs a helper needs its owner back

- [ ] The daily note stopped arriving, or nobody reads it.
- [ ] The same correction shows up 3 days in a row.
- [ ] It's passing on far more, or far fewer, than last month.
- [ ] The owner changed roles, and nobody updated this sheet.

Want AI helpers that come with an owner from day 1?

Content Systems.ai sets up every AI helper we build for logistics and e-commerce teams with a named owner, clear limits and a daily note. It's how we run our own company too. We build on the tools you already use, and you own what we build. Tell us where your team loses the most time, and we'll show you where to start.
